**Response to the WQAC Federal Election Platform**  
**Peter Campion, United Australia Party candidate for Kennedy**

G'day WQAC team

Thank you for sending me your federal election policy platform. I was delighted by the common sense approach your organisation has to regional issues – I couldn't detect a trace of the woke nonsense that some of the coastal Councils issue. Outstanding!

It looks like my views on the issues you have listed coincide closely with yours. Additionally, the United Australia Party's official policy set supports your objectives in ways that no other parties' do.

I'll copy the whole policy set below, however here's some highlights that I reckon you'll appreciate. This first one is from Craig Kelly's speech at our Cooloom launch on April 16 –

**The United Australia Party believes 25 % of the wealth generated from regions in Australia must be returned to that region, so the wealth can be reinvested in the region that generated it.**

Instead of using regions as a cash cow and then buying votes in compressed city electorates with that wealth, the UAP will develop the regions because we actually understand genuine wealth creation. We prefer classical Austrian School economics to the modern Keynesian nonsense that the LNP/ALP consortium follow, which has plunged our nation into over a trillion dollars debt.

**Bring Australian super investments home** - Australia has over one trillion dollars of superannuation invested overseas. Just like when John Curtin in World War 2 brought the troops back to save Australia, the United Australia Party will bring back a trillion dollars of Australian super back to Australia, to save Australia.

We all know the best investments are in infrastructure where competition is difficult, if not impossible. This makes dams, rail lines, roads, airports and the like particularly solid homes for superannuation that could so easily be lost on collapsing foreign share markets. Australians should have the benefit that flows from the investment of their money – not the people of foreign countries where it is now.

**Stop the provisional tax being paid in advance by Australian businesses, before profits have been made.** The United Australia Party will stop this unfair tax, to allow up to an extra ninety billion dollars to circulate in our economy and provide GST revenue for the government and jobs, jobs, and more jobs for Australians.

**The United Australia Party will abolish the Fringe Benefits Tax to release over \$6 billion into the economy.** Fringe Benefits Tax is a negative tax. It stops Australians doing things, stifles demand and growth, and kills employment. The UAP does not want to penalise people for spending their money that they have earned. Spending money creates wealth and jobs and makes the economic pie bigger for all Australians to share.

Ending provisional tax and FBT will benefit the regions immensely and encourage some of the bigger companies to spend more in the regions when their personnel visit their assets here.

**The Australian government is the main petitioner of bankruptcy and company liquidations.** As a result of business closures employees lose their jobs. The government then loses group tax, company tax and, in many cases, exports and GST - and as a result, services in education and health have to be cut to protect the revenue. If the government stopped driving business to the wall this wouldn't happen. **We will restructure the system to keep business going and to keep people employed productively.**

Imagine how many regional businesses would still be in operation in the regions today if the major parties had adopted this common sense approach to bankruptcies?

The Australian Government needs to support Australian industries and ensure that all of its policies are for the benefit of Australia first. **We must encourage Australians to buy Australian produce, and the labelling and packaging regime needs to be changed so that Australians know clearly what products are Australian.** That will enable Australians to make a choice to support Australian products.

The major parties looked like they were going to sort out labelling some years back, but they made a dog's breakfast of it to the point where labelling is now quite misleading and probably worse than it was before.

**A maximum of 3% interest on home loans to save Australian homeownership** - Liberal and Labor's trillion dollars of debt (\$1,000,000,000,000 – a million million) will increase home loan rates to 4% in two years and to over 6% in three years. At 4%, over 60% of Australians will default on their mortgages and will lose their homes. At 6% or more over 80% of Australians will lose their homes. The real estate market will then collapse and foreign buyers will flood our real estate market as they will have the money to buy up our properties. We have to stop Australians from losing their homes!

If we thought we had a problem with housing in the regions before, imagine how bad it will become if the mortgage interest rate rise predicted by the RBA this week (and by Deutsche Bank and the US Federal Reserve last week) come to be. The ALP/LNP UNiparty's debt looks certain to create an interest rate spiral, with the inflation we're already seeing hot on its heels.

**The UAP will make the first \$30,000 paid on a home loan tax deductible each year.** The United Australia Party will boost the construction industry and increase home ownership security. We will make the first \$30,000 paid on a home loan tax deductible each year and restore the great Australian dream for each Australian to own their own home.

The home loan deductibility will further ease the pressure on housing by reducing the mortgage stress and subsequent need for emergency housing.

**Repaying our National Debt with our resources** - Both Liberal and Labor fail to address the trillion dollars of national debt, but not the United Australia Party. We plan to address it head-on and save your family from its impact. Australia supplies over 80% of all iron ore to the Asian manufacturing market, where tens of trillions of dollars are invested in

manufacturing in China, Japan, Korea and the rest of Asia. Asia achieves its position in world trade by using Australian iron ore. Asian economies and industry have no alternative. In the 1960s, Australia had an export license on the export of iron ore. The United Australia Party will introduce a 15% export license on the export of all Australian iron ore. The export license receipts will be isolated for the sole purpose of repaying our national debt which will relieve every Australian from that burden and set up our future. We will do this so Australia can be all it can be without the financial destruction the Labor and Liberal parties have imposed on our country. The export license receipts will be isolated for the sole purpose of repaying our national debt which will relieve every Australian from that burden and set up our future. We will do this so Australia can be all it can be without the financial destruction the Labor and Liberal parties have imposed on our country.

The UAP will eliminate the UNiparty's debt in as little as 18 years. The LNP plan won't start to repay the debt until 2032 and would take 150 years. The ALP plan will take somewhere between 180 and 360 years – if ever. Only the UAP has a plan kill off inflation and clear that unwarranted debt by boosting our regional mining industries.

Probably the most important single paragraph from the UAP media release from the April 16 Coolom launch is the first one...

ENACTING a Bill of Rights outlawing lockdowns, protecting the right of all Australians to choose medical treatment and preserving freedom of speech will be the United Australia Party's first task when elected to government, party leader Craig Kelly said today.

The United Australia Party will establish an Australian Bill of Rights to enshrine our freedom forever. Our nation was founded from a penal colony and those who framed our Constitution had the US Bill of Rights in front of them - but they didn't trust us enough to give us those rights. People only have the rights their governments are prepared to grant them, and as we saw with covid, they can be removed on a whim when somebody sneezes. We can only preserve our marvellous environment and keep Australians out of poverty and slavery if we are a prosperous nation, and prosperity is born of freedom and inalienable rights.

I'll copy that full media release below the policies.

Thank you for reading this response and feel free to give me a call to discuss any issues. If elected in May I look forward to working closely with you to make our regions great again.

**Peter Champion**

United Australia Party candidate for Kennedy

0407 248 751

[kennedy@unitedaustraliaparty.org.au](mailto:kennedy@unitedaustraliaparty.org.au)

<https://www.unitedaustraliaparty.org.au/candidate/peter-campion/>

**National UAP Policies already listed on our website -**

[https://www.unitedaustraliaparty.org.au/national\\_policy/](https://www.unitedaustraliaparty.org.au/national_policy/)

### **A maximum of 3% interest on home loans to save Australian homeownership**

Liberal and Labor's trillion dollars of debt (\$1,000,000,000,000 – a million million) will increase home loan rates to 4% in two years and to over 6% in three years.

At 4%, over 60% of Australians will default on their mortgages and will lose their homes. At 6% or more over 80% of Australians will lose their homes.

The real estate market will then collapse and foreign buyers will flood our real estate market as they will have the money to buy up our properties. We have to stop Australians from losing their homes!

The United Australia Party will introduce a maximum interest rate for all home loans of 3% per annum for the next five years to save Australian homeownership.

### **Repaying our National Debt with our resources**

Both Liberal and Labor fail to address the trillion dollars of national debt, but not the United Australia Party.

We plan to address it head-on and save your family from its impact.

Australia supplies over 80% of all iron ore to the Asian manufacturing market, where tens of trillions of dollars

are invested in manufacturing in China, Japan, Korea and the rest of Asia.

Asia achieves its position in world trade by using Australian iron ore. Asian economies and industry have no alternative. In the 1960s, Australia had an export license on the export of iron ore. The United Australia Party will introduce a 15% export license on the export of all Australian iron ore.

The export license receipts will be isolated for the sole purpose of repaying our national debt which will relieve every Australian from that burden and set up our future.

We will do this so Australia can be all it can be without the financial destruction the Labor and Liberal parties have imposed on our country.

The export license receipts will be isolated for the sole purpose of repaying our national debt which will relieve every Australian from that burden and set up our future.

We will do this so Australia can be all it can be without the financial destruction the Labor and Liberal parties have imposed on our country.

## **Bring Australian super investments home**

Australia has over one trillion dollars of superannuation invested overseas.

Just like when John Curtin in World War 2 brought the troops back to save Australia, the United Australia Party will bring back a trillion dollars of Australian super back to Australia, to save Australia.

## **End Lockdowns**

Lockdowns destroy businesses, jobs and the Australian standard of living. Lockdowns cause untold damage to both physical and mental health, and lockdowns cause more harm to society than any marginal benefits they may bring.

The UAP policy is to open the economy, open the borders and provide encouragement, confidence and incentives for businesses, especially small business to thrive.

Free trade between the states and free movement of people must be reinstated. Section 92 of the Australian Constitution provides for the “absolutely free” movement of people across state borders. Australian troops must not be used to assist power-drunk State Premiers in violating our Constitution.

The Federal Government must ensure that the Constitutional rights of all Australians are protected by exercising their federal jurisdiction.

## **No Domestic Vaccine Passports**

The latest international data and science evidences that so-called “fully vaccinated people” can still become infected and still likely to pass the virus on to others.

Therefore ‘vaccine passports’ are premised on a false assumption; they are misleading and serve no purpose other than to deny people their normal human rights.

They will be divisive for all Australians, cause social problems (as seen in Europe), and have the potential to worsen an already growing mental health epidemic in our country, which will have tragic consequences for many Australians.

It is undemocratic and wrong to deny any Australian their constitutional rights and freedoms because they choose not to take part in a vaccination program for personal or medical reasons.

The United Australia Party will fight to ensure vaccine passports are banned in Australia. Where they are introduced, we will challenge their validity in the High Court on behalf of the Australian people.

## **Respect the Sanctity of Doctor-Patient Relationship**

The United Australia Party believes in the sanctity of the doctor-patient relationship and the privacy of your medical or health information.

Alternative treatments to COVID-19 (including anti-virals) that have shown extraordinary success where administered in many overseas countries, must be included in the treatment options and available for all Australians.

Medical treatments should not be mandated from on high by government chief health officers who have not seen or examined the patients for whom they are mandating particular or a narrow range of treatments.

### **Abolish National Cabinet**

Since federation, the Australian Federal Government Cabinet has been comprised from Federal Members of Parliament, voted for and elected by the Australian people.

The current Morrison Government has imposed this unconstitutional so-called 'National Cabinet' that has no legal basis.

The United Australia Party believes this so-called 'National Cabinet' should be abolished as soon as possible, with traditional government and freedom restored to the Australian people.

### **End Australia's Energy Crisis**

Australia has the world's largest deposits of uranium, however while we export uranium to other nations for them to take advantage of, we ban its use in Australia for electricity generation.

The government should be proactive in establishing research into new nuclear technology to help solve Australia's energy problems.

China, Europe and the United States all benefit from nuclear power. Australia should benefit from our own resources and Australian industries should be benefitting from cheap power so they can compete internationally.

### **Strengthen Australia's Defence**

Australia's defence budget must be used to defend the nation, and not used for political expediency or to achieve politically correct outcomes.

We called for the submarine contract with France to be abandoned months before the Federal Government decided to act. It is yet another United Australia Party policy that has been adopted at federal level.

Submarines should be coordinated with and purchased from the United States of America, where highly effective, cheaper nuclear-powered submarines can be acquired and integrated with the forces of our allies during times of conflict or war.

Australia must ensure our national submarine fleet is competitive with the nuclear submarines of our northern neighbours.

### **Protecting Free Speech from Foreign Tech Giants**

Foreign tech giants that operate as platforms (not publishers) such as Facebook, YouTube and Twitter should not be able to censor Australian political debate.

The United Australia Party will seek to implement laws preventing this foreign interference in Australian politics and our elections.

### **Protect Australian Values**

The United Australia Party stands to protect the values that have been built and developed in this country since federation.

We believe in the most basic freedoms of parliamentary democracy – freedom of speech, freedom of religion, freedom from fear, and freedom of association.

This includes respect for our Constitution and the rule of law, which underpins our democratic society and protects the rights, freedoms and liberties of every Australian citizen.

### **Zonal Taxation for Regional Communities**

Our regional communities are the backbone of the nation and the United Australia Party is committed to stimulating economic growth in rural areas.

Our cities are bursting at the seams. We face a future of heavy congestion, serious housing affordability issues and mounting cost of living pressures.

By providing a 20% tax concession incentive to people living more than 200kms from a capital city, we can decentralise Australia and encourage people to move to or settle in regional areas.

### **Process Australian Minerals at Home**

We can create thousands of jobs and turbo-charge our exports by processing our mineral resources in Australia, leading to enormous revenue injections and better schools and hospitals.

Australia is failing to maximise revenue from its prized mineral resources by continuing to send unprocessed ores overseas. The United Australia Party's downstream processing policy will see more stages of the mining process happen on Australian soil rather than offshore, resulting in much higher returns, along with stimulants for both economic growth and job creation.

We can use Australia's mineral resources to kick-start our economy by setting up downstream processing in the states such as South Australia and Victoria that aren't resource-rich.

### **UAP Policy updates announced by Craig Kelly during Saturday, 16th April 2022**

**1. Stop the provisional tax being paid in advance by Australian businesses, before profits have been made.** The United Australia Party will stop this unfair tax, to allow up to an extra ninety billion dollars to circulate in our economy and provide GST revenue for the government and jobs, jobs, and more jobs for Australians.

**2. The United Australia Party will abolish the Fringe Benefits Tax to release over \$6 billion into the economy.** Fringe Benefits Tax is a negative tax. It stops Australians doing things, stifles demand and growth, and kills employment. The UAP does not want to penalise people for spending their money that they have earned. Spending money creates wealth and jobs and makes the economic pie bigger for all Australians to share.

**3. The UAP will make the first \$30,000 paid on a home loan tax deductible each year.** The United Australia Party will boost the construction industry and increase home ownership security. We will make the first \$30,000 paid on a home loan tax deductible each year and restore the great Australian dream for each Australian to own their own home.

**4. The United Australia Party will reduce the taxation rate on a person's second job.** This will result in higher income over the average weekly earnings by 50 per cent, giving all Australians the incentive and providing Government with increased revenue which would not be paid if a person didn't take on a second job if they choose to do so.

5. We must respect and support our senior Australians who have built our great country. Our senior citizens are currently paid less than others relying on government support. We must change this as a priority. **As a first step, the United Australia Party government will increase the pension for retirees by an extra \$180 a fortnight.**

6. When in government, the United Australia Party's sound economic policies, will enable the UAP to provide **\$40 billion additional funding for health across Australia and will make such funding available directly to hospitals.**

**7. The Australian government is the main petitioner of bankruptcy and company liquidations.** As a result of business closures employees lose their jobs. The government then loses group tax, company tax and, in many cases, exports and GST - and as a result, services in education and health have to be cut to protect the revenue. If the government stopped driving business to the wall this wouldn't happen. **We will restructure the system to keep business going and to keep people employed productively.**

8. We need to provide more funding for education in Australia. A free nation can rise no higher than the standard of excellence set in its schools, colleges, and TAFE's. Ignorance and illiteracy, and under-skilled workers, have been failures of our education system in the past and have bred failures in our social and economic systems, delinquency, unemployment, and chronic government dependency. This causes a waste of human resources, a loss of productivity, and an increase in tax-supported benefits. **The United Australia Party will inject an extra \$20 billion into the education system in our first three years in Government.** It's time to invest in ourselves and the next generation. The UAP believes we must educate our children as our most valuable resource, we must make it possible for those with talent to go to university, but we must also ensure those who are educated can find a job after graduating from university. That's why our ability to compete internationally and to expand our exports is so important. **Because of our policy to pay back the government's debt, the United Australia Party Australia will forgive and remove all HECS fees.** We will remove this burden and give young Australians hope and encouragement.

9. The UAP will protect Australia. One hostile nuclear-powered submarine placed between Singapore and Perth would cut off Australia's supplies of oil from Singapore and close down the nation within 60 days. **We must take immediate steps to acquire nuclear submarines, such as the Los Angeles class subs from the US.** The security of our nation is of paramount importance. Our armed forces' prime responsibility must be to protect Australia, and to be a reliable ally.

10. **A United Australia Government will link all service pensions to the male total average earnings.** We will expand all gold card benefits to all peacekeepers. Gold card benefits will be automatically delivered to the spouses of all veterans for the term of their life.

11. The Australian Government needs to support Australian industries and ensure that all of its policies are for the benefit of Australia first. **We must encourage Australians to buy Australian produce, and the labelling and packaging regime needs to be changed so that Australians know clearly what products are Australian.** That will enable Australians to make a choice to support Australian products.

12. **The United Australia Party believes 25 % of the wealth generated from regions in Australia must be returned to that region, so the wealth can be reinvested in the region that generated it.**

13. The Liberal and Labor parties are full of lobbyists. As long-standing Liberal Senator Concetta Fierravanti-Wells states, there is a putrid stench of corruption emanating from the New South Wales Liberal Party. **The United Australia Party believes that lobbyists should be excluded from holding official positions in political parties.** Lobbyist firms often employ former ministers from both political parties, and big business can get policy changes by paying money to such firms to represent their views. This represents a serious conflict of interest and undermines the democracy that Australians have fought for. Lobbying mixed with political parties undermines Australians' vote. **A United Australia team will legislate to restrict the role of lobbyists in directing political parties.**

**MEDIA RELEASE - Coolum: Saturday 16 April**

#### **United Australia Party unveils plan to defend Australia's freedom**

ENACTING a Bill of Rights outlawing lockdowns, protecting the right of all Australians to choose medical treatment and preserving freedom of speech will be the United Australia Party's first task when elected to government, party leader Craig Kelly said today.

"The Australian Constitution has no greater purpose than to protect and defend our freedom and the nation's security," Mr Kelly said at the United Australia Party's official campaign launch at Palmer Coolum Resort.

"The Constitution must become the hallmark of freedom and the United Australia Party will propose changes to the Constitution to ensure freedom forever for all Australians.

"Our country is in crisis. The Liberals and Labor are keeping Australians in the dark. The Liberals and Labor are just waiting until after the election to lock us all down and destroy Australia's economic prosperity."

Mr Kelly said the trillion dollars of debt Scott Morrison and Josh Frydenberg had run up would destroy the lives of all Australians unless urgent steps were taken to stop it.

"The Liberals and Labor's trillion dollars of debt ensures that home loan interest rates will rise to above 6% pa and in doing so 80% of Australians will default on their mortgages and lose their homes.

“They will be out on the street dependent of government handouts and government control to survive.

“Only the United Australia Party team can save Australian’s homes. We will pass a law limiting all home loan interest rates to be below 3% interest rate for the next five years to save Australians’ homes and their way of life.

“For Australians who own their own home we will preserve the value of their property by avoiding the great bargain sell off that awaits all Australians if we allow the trillion dollars of Liberal and Labor debt to destroy Australia’s economy.”

Mr Kelly said the United Australia Party had a clear plan to repay the debt and free Australia and future generations from burden.

“There is over fifty trillion dollars invested in Asian manufacturing which dominates world trade. Australia is the biggest supplier of iron ore to Asia and allows Asia to dominate the manufacturing export market because they have access to Australian iron ore. Asia has no alternative,” Mr Kelly said.

The United Australia Party will introduce a 15% export licence payable on the export of all iron ore from Australia and those funds will be quarantined for the sole purpose of repaying the trillion dollars of debt that the Liberals and Labor caused.

“The United Australia Party will save Australia’s triple A credit rating. We will save the homes of Australians and increase all Australians’ living standards and wages.

“Our regional communities are the backbone of the nation and the United Australia Party is committed to stimulating economic growth in rural areas.

“Our cities are bursting at the seams. We are faced with heavy congestion, serious housing affordability issues and mounting cost of living pressures in our cities.

“By providing a 20% tax concession incentive to people living more than 200km from a capital city, we can decentralise Australia and encourage people to move to or settle in regional areas. This will provide Australians with a lower cost of living and housing affordability, and ensure our existing infrastructure in the regions and competitive industrial land is fully utilised.

“The movement of our citizens from the cities to the regions will reduce the pressure on infrastructure in the cities and bring prosperity to Australia.

“Regional Australia is the forgotten Australia by all political parties, as are Tasmania and the Northern Territory.

“We need to support regional Australia by reintroducing a zonal taxation system. This will provide an incentive to decentralise Australia and maximise the delivery of services to regional Australia.

“It will provide the incentive regional areas need to ensure that regional hospitals have doctors, and that regional industries develop for the benefit of their communities and all of Australia.

“We have to end the discrimination against rural industries and give them the means to compete internationally,” he said.

Mr Kelly said Japan had become the world’s third largest economy by processing Australian resources.

“Wages in Japan are higher; the cost of energy is more expensive and Japan suffers from the tyranny of distance.

“Yet Australia sells its mineral ores at \$40 to \$200 a ton and Japan sells final products at up to \$20,000 a ton or more. To create jobs, generate more government revenue, along with a stronger balance of payments, the Australian government needs to encourage the use of the mineral resource wealth of Western Australia and Queensland to support downstream manufacturing in states and territories that don’t have those resources, such as New South Wales, South Australia, Tasmania and Victoria.

“Australia is failing to maximise revenue from its prized mineral resources by continuing to send unprocessed ores overseas. We can use Australia’s mineral resources to kick-start our economy.”

The United Australia Party’s downstream processing policy will see more stages of the mining process happen on Australian soil resulting in much higher returns, along with stimulating economic growth and job creation and rising standards of living and wages.

“We can create thousands of jobs and turbo-charge our exports by processing our mineral resources in Australia, leading to enormous revenue injection, better schools and hospitals,” Mr Kelly said.

“This will create jobs, increase our exports and provide greater revenue and a rising, rather than declining, standard of living for all Australians. Higher export revenue means better education and health services for all Australians.

“At rallies in every capital city and in regional centres, Australians, our party members and their supporters have made it clear to the government that enough is enough.

“The freedom demonstrations across Australia have been attended by more people than Jim Cairns’ moratoriums against the Vietnam War.

“Governments never give back freedom they take from their people. The people have to take it back,” Mr Kelly said.

“In Sweden they have created a new skin implant where the government can add different functions such as personal bank accounts, health history, court and other records. Face scanning technology is being used to confirm people’s identity and geo-mapping is in place to check exactly where you are.

“Facial recognition is now in Australian schools. Every time you log on to different forms of social media, facial technology can play a part. The Australian Government is setting up a database that will match images of everyone pictured on CCTV with their driver’s license and passport photos. They have dubbed the system, ‘The Capability’.

“Laws passed by Morrison and Dutton even allow the Australian Government to share our data with third party companies that could be from overseas.

“They could sell our data back to us, sell our own medical records to us. Some people are genuinely concerned that they are being commodified, objectified and dehumanised,” Mr Kelly said.

“If our government is allowed to continue with this plan of mass biometric surveillance, our lives would never be the same. Our children would never know the freedoms we grew up with.

“Only the United Australia Party is committed to saving Australians from the overreach of power and unwarranted control and suppression that both sides of government have shown us in the last few years.

“When elected The United Australia Party will stop the government spying on its citizens.

“That is why our election campaign slogan for 2022 is Freedom Forever.

“Freedom includes freedom from government intimidation and from the government seeking to interfere with the political process, our jobs and our families.”

Mr Kelly said the public had a right to know and an implied right to informed consent in respect of medical treatments.

“Contrary to the High Court of Australia’s ruling on the implied right to political free speech, the Liberal Government has threatened media outlets and owners with the loss of Government advertising revenue and have imposed censorship in Australia,” he said.

“Every day the Labor and Liberal parties continue to disappoint the Australian people.

“The government continues to ignore hundreds of thousands of Australians in Canberra, Melbourne, Sydney, Brisbane and Perth and right across the nation who are fighting every day for our freedom and right to choose.

“Facebook imposes censorship by cancelling Australian’s pages if Facebook, a foreign owned company, does not approve what Australians want to say.

“Foreign interference in our elections can’t be tolerated and once the United Australia Party is elected, we will take immediate action to ensure Facebook respects Australian’s right to free speech.

“In 2022 the United Australia Party will restore Australia’s freedom across the country. We are part of a great national movement.”

“Australia’s trillion dollars of debt means our economy is spiralling down and people are holding onto their savings in fear.

“People are suffering in the Latrobe Valley in Victoria, in the Hunter region in New South Wales, at Elizabeth in South Australia, right throughout the states of Queensland and Western Australia and all through Tasmania.

“Australians have lost hope in the future. We have to re-establish confidence and lead the nation; not tomorrow but now.”

Mr Kelly said Australia was the fourth largest holder of pension fund assets in the world.

“Australian super funds have around 3.5 trillion dollars and are one of the largest sources of capital in the world, but much of it is invested in North America and Europe and does not provide economic growth and employment for our citizens.

“Under a United Australia Party government, at least one trillion dollars of Australian super invested off-shore will be required by law to be instead invested in our country to secure our citizens’ economic prosperity and maintain the nation’s independence,” he said.

“One trillion dollars of growth injected in our economy is more money than the Liberals or Labor can provide our country.

“It’s projected that in 2041 we will have 9.5 trillion dollars of super and that super must be deployed to benefit our country and our people, not some foreign country.”

One of the United Australia Party's long-standing policies is to stop the provisional tax being paid in advance by Australian businesses, before profits have been made.

"The United Australia Party will stop this unfair tax, to allow up to an extra ninety billion dollars to circulate in our economy and provide GST revenue for the government and more jobs for Australians.

"Every time that 90 billion is turned over it create and extra nine billion dollars in GST for Australia," Mr Kelly said.

The United Australia will also abolish the Fringe Benefits Tax to release over \$6 billion into the economy.

"Fringe Benefits Tax is a negative tax. It stops Australians doing things, stifles demand and growth and kills employment. We don't want to penalise people for spending money. Spending money creates wealth, jobs, and makes the pie bigger for all Australians to share," Mr Kelly said.

"The United Australia Party will boost the construction industry and increase home ownership security. We will make the first \$30,000 paid on a home loan tax deductible each year and restore the Australian dream for each Australian to own their own home.

"The United Australia Party will reduce the taxation rate on a person's second job, which results in higher earnings over the weekly average earning by 50 per cent, giving all Australians the incentive and providing Government with increased revenue which would not be paid if a person didn't have a second job.

"Our senior citizens are paid less than others relying on government support. We must change this as a priority. As a first step, the United Australia Party government will increase the pension for retirees by an extra \$180 a fortnight," Mr Kelly said.

"Healthcare is declining every year in Australia and we cannot desert the sick or the dying.

"Our hospital staff are overworked and the capital infrastructure is not up to the projected increased demand. Despite the extra one trillion dollars the government has borrowed, nothing has been spent building new hospitals or investing in health care.

"Once in government, the United Australia Party will provide \$40 billion additional funding for health across Australia and will make such funding available directly to hospitals.

"The Australian government is the main petitioner of bankruptcy and company liquidations.

"As a result of business closures, employees lose their jobs. The government then loses group tax, company tax and, in many cases, exports and GST. As a result, services in education and health have to be cut to protect the revenue.

"If the government stopped driving business to the wall this wouldn't happen. We will restructure the system to keep business going and to keep people employed productively.

"We need to provide more funding for education in Australia. A free nation can rise no higher than the standard of excellence set in the schools and colleges.

"Ignorance and illiteracy, unskilled workers and school drop-outs are failures of our education system in the past which have bred failures in our social and economic systems, delinquency, unemployment and chronic dependency.

"This is a waste of human resources, a loss of productive and an increase in tax supported benefits," Mr Kelly said.

"The United Australia Party will inject an extra \$20 billion into the education system in our first three years in Government. It's time to invest in ourselves and the next generation.

"We must educate our children as our most valuable resource. We must make it possible for those with talent to go to university, but we must also ensure those who are educated can find a job after graduating from university.

"That's why our ability to compete internationally and to expand our exports is so important. Because of our policy to pay back the debt the United Australia Party Australia will forgive and remove all HECS fees.

"Most importantly, we must protect Australia. One hostile nuclear-powered submarine placed between Singapore and Perth, and Australia would be cut off from supplies of oil from Singapore which could close down the nation within 60 days.

"We must take immediate steps to acquire nuclear submarines now, such as the Los Angeles class subs from the US. Now. Not in 40 years' time," Mr Kelly said.

"Our armed forces' prime responsibility must be to protect Australia and to be a reliable ally.

"We need a stable world to expand our exports and to be a reliable member of the international community.

"Our most important trading partners and our main allies must know that they can count on Australia.

Our defence forces need to rearm and redeploy the best technology to meet Australia's defence needs.

"Our army, navy and air force personnel are Australians and valuable members of society. We cannot take their service to the nation and disregard them as Labor and the Liberals have done for the last 20 years.

"A United Australia Party government will link all service pensions to the male total average earnings.

"We will expand all gold card benefits to all peacekeepers. Gold card benefits will be automatically delivered to the spouses of all veterans for the term of their life."

The Australian Government needs to support Australian industries and ensure that all of its policies are for the benefit of Australia first.

"We must encourage Australians to buy Australian produce, and the labelling and packaging regime needs to be changed so that Australians know clearly what products are Australian.

"If the product contained in any package or container is not at least 95 per cent Australian product then it will not have a green and gold classification and labelled Australian. Anything less should have a red label and be marked as foreign," Mr Kelly said.

The United Australia Party believes 25 per cent of the wealth generated from regions in Australia must be returned to that region so that the wealth can be reinvested in the region that generated such wealth.

"The Liberal and Labor parties are full of lobbyists. The United Australia Party believes that lobbyists should be excluded from holding official positions in political parties.

“Lobbyist firms often employ former ministers from both political parties and big business can get policy changes by paying money to such firms to represent their views. This represents a serious conflict of interest and undermines the democracy that Australians have fought for,” Mr Kelly said.

“A United Australia team will legislate to restrict the role of lobbyists in directing political parties.

“Energy prices are just too high in Australia and the United Australia Party will take real action to reduce them as the cost of energy is the key to Australia’s industrial development.

“When the ANZACs went overseas they didn’t go overseas as members of the Liberal Party or as members of the Labor Party. They went as Australians. We need to put the idea of a class war behind us and unite the nation,” Mr Kelly said.

“The Liberal government has done its absolute best to build fear over the last two years. They have shut down every single voice which provided an alternate point of view to their narrative.

“They have silenced hundreds of doctors, they have silenced the community, they have silenced academics they have silenced Australians who dared to ask questions and demand answers.

“The right to ask questions is fundamental to a free and open society but we have been denied that right.

“History shows us that segregation is evil. It shows us that we must reject authoritarianism and instead pursue more democratic and inclusive ideas. Recent history is full of examples of what an elected government can do when it becomes emboldened with too much power.

“Governments love to use a crisis, whether real or imagined, to give themselves more power. When they seek to subvert the democratic process because they tell the people that it’s for their safety or their protection, we know what the usual outcome is. The usual outcome is tyranny.

“The Australian Government must bring rogue states into line. It is in the Liberals and Labor’s interests to create fear and division. A divided society is easier to control.

“While people are busily fighting amongst each other the Liberal Party and Labor Party want to be left free to control us unabated and unchecked.

“Labor and the Liberals have already caused too much damage to Australia, with their trillion-dollar debt,” Mr Kelly said.

“If you believe, as I do, that this nation has the strength and potential to live out its heritage and fulfil the dreams of the ANZACs, to return Australia to being the lucky country it should be, you must give the United Australia Party your support.

“Australians can make a difference. Together we will stand up. Together we will create change. Together we will make a better tomorrow. Freedom Forever,” he said
